

MicrobeRepel™

with Stain and Odor Resistance!

ANTIMICROBIAL INTERIOR PROTECTION – Dow Corning Technology used and developed for the Aerospace Industry. It physically bonds to the surface, destroying microorganisms present and creating a durable anti-microbial barrier to give long-term protection. It is highly durable, long lasting and EPA registered.

50 million people in the US today suffer from airborne allergens. Let's give our customers an allergy package for their cars.

- Mold
- VOC's
- Mildew
- Pets
- Dust Mites
- Pollen

Our customers already want our products and have our products

- 70% of women use sanitizers on a daily basis
- Hand sanitizer growth is up 70% over last year
- It's likely someone that gets in your car will have allergies

Providing innovative products

- A new and disruptive technology that helps secure your dealership relationship
- The only product available that triggers an emotional and value sale
- Our products sanitize and reset vehicles back to better than factory specifications
- Think of our allergy package for cars as a flu shot or antivirus for your computer

Our products use EPA registered formulas. EPA registered products that make claims undergo similar scrutiny as the medical industry for use with products for human contact.

If it is good enough for the NFL, athletic programs and emergency transport vehicle's it should be good enough for your car.

Examples of our products in use: Ebola transport vehicles, including aircraft and other emergency vehicles, The Tampa Bay Bucks, University of Virginia, and most G3 private jets to mention a few.
